FEATURES & BENEFITS

• Steel-reinforced with welded wire mesh.

• Each unit is 2’ x 2’ x 4” thick and weighs 95 lbs.

• Pervious concrete grid ideal for commercial applications.

• Approved for H-20 loading for parking, service roads, tree pits, and fire lanes. It is also ideal for stabilizing embankments along streams, rivers, and lakes.

• LEED® credit potential: Open grid pavement with an SRI > 29; stormwater runoff reduction; and regional materials.

• Checker Block is manufactured in accordance with ASTM 1319, (Standard Specification for Concrete Grid Paving Units) which requires a minimum compressive strength of 5,000 psi.

• Large surface void area allows for significant turf establishment (not always feasible with plastic or TurfLock).

• Each 4 square foot unit is 4” thick, and provides a 75% grass to concrete ratio (ratio measured by each 4 sq. ft. section), ensuring a green turf that can support significant vehicular loads.

• Manufactured with 30% recycled material - post consumer.
