Environmentally Smart

Harmony Permeable Pavers are designed with a wider joint dimension that allows more water to filter through and ensure that the pavers function as part of an effective storm water management system, even in the heaviest rain events.

A Variety of Design Options

Offered in a variety of colors, both blended and monotone, the Harmony paver is manufactured with three shapes. These three shapes can be hand-set or installed with a machine to maximize speed on your projects.

Sold by the layer (11.51 sq.ft.).

Layer Pattern

*Note: In machine-laid applications, the shaded pavers shown above are designed to be interchangeable to allow for stitching of the pattern. Harmony units are manufactured to create a three piece pattern, mechanically installed by pallet layer. Schematic above illustrates paver sizes/orientation on the layer.

Questions?

For more information on this and other permeable pavers, please contact Reading Rock at 800.482.6466 or your Market Manager.
