METRO
DIRECT VENT GAS FIREPLACE

HEAT & GLO.
Take modern design to new places. The compact and efficient METRO fits where other fireplaces don’t. From uptown to downtown. And everywhere in-between.

METRO shown with modern front in fog gray
**CREATIVE APPLICATIONS**
A slender profile, single-sided or see-through models and flexible venting options accommodate creative installation applications. Think about different placements on the wall, or in a secondary or unique space.

**PERSONALIZED DETAILS**
Choose your own blend of finishing details for your own look. Fronts channel attention. Distinct interior options showcase the flame differently. A reflective porcelain firebox keeps it all shining bright.

**TECHNOLOGIES**

**INTELLIFIRE™ IGNITION SYSTEM**

The Intellifire™ Ignition System (IPI) is an advanced intermittent pilot ignition system. IPI constantly monitors ignition, ensures safe functioning and conserves up to $10/month in energy costs.

**DIRECT VENT TECHNOLOGY**

Direct Vent fireplaces remove 100% of combustion exhaust and odors outside of the home. These sealed fireplaces provide optimal heat, conserve energy and ensure clean, safe indoor air quality.

**HEAT ZONE TECHNOLOGY**

Draw heat from the fireplace into another room of the home, up to 20 feet away. When a heat zone kit is run continuously, it will redirect up to 25% of the fireplace’s heat to another area, thus reducing wall temperatures above the fireplace. Two heat zones run continuously will redirect up to 50% of the fireplace’s heat.

**CONTROLS**

Turn modern art on fire. Operate the METRO with an added level of function and convenience with an optional wall switch or remote control.
